THE TERMS *ΡΩΜΑΙΟΣ*, *ΕΛΛΗΝ*, *ΓΡΑΙΚΟΣ* IN THE BYZANTINE TEXTS IN THE  
FIRST HALF OF THE 13TH CENTURY\*

The Topic

One way to approach the past is by the analysis of words and terms in the texts written at the time, because they carry special semantic load and, thus, help us to understand the way of thinking, the perspective of various social groups. Collective nouns are a special category of such terms, because they are connected to self-definition, namely the identity of various social groups. In Byzantine texts the terms *Ρωμαῖος*, *Ἐλλῆν* and *Γραικός* are conspicuous and therefore have attracted the attention and interest of modern researchers. Although found in Greek sources already before the Christian era, they are almost continually in use throughout the entire Byzantine period. Consequently, a question about their content and connotations arises as to whether their meaning has changed over time or remained stable.

Before proceeding to the analysis of the names mentioned above, it is necessary to make two comments. The first concerns the terms *Ἐλλῆν* and *Γραικός*. In the modern era, these words designate specific groups and denote their national identity. Therefore, the modern reader is tempted to

\* This article is based on a paper presented in the XXIIth International Congress of Byzantine Studies in Sofia, August 2011, where matters concerning Byzantine identity were the topic of other presentations, as well. See, for instance, J. KODER, Byzantium as seen by itself – images and mechanisms at work, *Proceedings of the 22nd International Congress of Byzantine Studies, Sofia, 22-27 August 2011. v. I, Plenary Papers*, Sofia 2011, 69-81. I am grateful to Professor J. Koder for his valuable advice regarding this presentation.

attribute a similar meaning to the terms as well within their Byzantine context. The issue becomes even trickier, because the term *nation* (εθνος) is also attested in Greek sources of pre-Christian as well as those of Christian era. Nevertheless, it would be anachronistic to perceive the meaning of εθνος in the Byzantine sources in the way it has been defined in the Modern era, an era marked by the Enlightenment and the Industrial Revolution<sup>1</sup>.

The term *ethnicity* could be suggested, collective as it is, to designate a social group denoted in the sources by the terms *Ἐλλῆνες* and *Γραικοί*. According to anthropological literature, however, this term was introduced with well-founded argumentation a little after the 1970's and is mainly associated with the industrial and post-colonial social contexts, despite the fact that pre-existing cultures have been taken into consideration<sup>2</sup>. Therefore, the term *collective identity*, as it is broader in terms of meaning, is considered more appropriate for use in the present work which describes pre-modern societies and perspectives.

The second comment concerns the origin of the sources. They are part of a literature created by scholars who had ties to the imperial court and quite often held an office, so they express the official line of the state. This is an additional factor that emphasizes the caution that is needed for the interpretation of these terms, as they may have multiple meanings depending on the context of the work in which they appear, the time to which they refer and the audience whom they address. In addition, the conditions of

1. Theorists on nation and nationalism disagree on the conditions and causes which lead to the creation of nationalism and nations. They concur only on the period in which nationalism was born, that is the era of the Enlightenment and the Industrial Revolution. From the vast bibliography on *nation* and *nationalism* see indicatively, E. GELLNER, *Nations and Nationalism*, Oxford 1983; E. J. HOBSBAWM, *Nations and Nationalism since 1780. Programme, Myth, Reality*, Cambridge 1992<sup>2</sup>; B. ANDERSON, *Imagined Communities: Reflections on the origin and spread of nationalism*, New York 1983; A. SMITH, *National Identity*, London 1991.

2. *Encyclopedia of Social and Cultural Anthropology*, eds. A. BARNARD – J. SPENCER, London - New York 1996/2003 (hereafter: *ESCA*), entry *ethnicity*, where further bibliography is referred. Three different approaches to understanding ethnicity have been formed, the premordialist, the instrumentalist and the constructivist. Although it is argued that all three theories could be integrated into one coherent theory of ethnicity, it is noted that the nucleus of such a synthesis would be the constructivist conceptualization that emphasizes the contingency and fluidity of the ethnic identity (*ESCA*, same entry).

the historical period in question can delineate a collective identity, both of the writers and their audience. In the present study, the authors are scholars and their audience is their immediate circle, the court of the rulers of the State of Nicaea and their environment<sup>3</sup>.

### The Time

The sources were written in the first half of the 13th century, a period that marked a turning point in the history of Byzantium. After the Fall of Constantinople in 1204, the empire disintegrated<sup>4</sup> and new states were created among its territories<sup>5</sup>. Some of these were states created by Crusaders who belonged to the nobility, the most significant being that which retained Constantinople as its capital. Three states were created by

WILSON (*Scholars of Byzantium*, London 1983/1996, 218-228), makes reference to Nicaea and comments that their main task was to restore the educational system as it had been before 1204, a task in which they succeeded. Generally on literacy, books production and education, see *Dumbarton Oaks Colloquium 1971: Byzantine Books and Bookmen*, Washington DC 1975; R. respectively, whereas at the same time the Bulgarian state with Turnovo as its capital began to emerge as a dynamic power<sup>9</sup>. These rulers, in terms of foreign policy, aspired to either retain Constantinople or make Constantinople their capital city<sup>10</sup>.

In the mid-13th century, Byzantine Nicaea fulfilled this ambition. For this reason, the sources on which this study is based derive from the scholarly circle of Nicaea. The conditions during the period delineated by the first Fall of Constantinople and the enthronement of Michael Palaiologos as its ruler constitute a new historical setting. Within this framework, we will examine the Byzantines' self-concepts and self-definitions, in other words, their collective identity.

### Collective Identity: the modern theories

First of all, it should be noted that the issue of collective identity is part of theoretical debate concerning the modern period. Therefore, the question of the collective identity of the Byzantines is, of course, expressed through the perspective of contemporary researchers, thus, making it necessary to clarify the meaning of the term.

According to Sociology<sup>11</sup>, the definition of the term *collective identity*

11. For a brief and cohesive presentation of *identity* see ESCA, entry *identity*, where also

is the awareness of any individual belonging to a particular social group, from which he derives his values and worth<sup>12</sup>. In addition, the members of this group are bound together in a complex environment of common beliefs and values, seeing themselves as sharing ideals and, simultaneously, differentiating themselves from other groups and their members<sup>13</sup>.

At this point, it would be only natural for some reservations to be expressed concerning the validity of a modern theory being used to interpret historical phenomena from a pre-modern era. However, this theoretical pattern of interpretation can also be applied to pre-modern societies, because it has a broader scope, and, as already mentioned, takes into account the common beliefs and values of any social group, characteristics which are not restricted to modern societies. It is these beliefs and values that constitute the self-image of the Byzantines during the first half of the 13th century that are the subject of this paper; more specifically, it is the self-concept of the Byzantines as delineated by the names *Ρωμαῖος* - *Ἐλλην* - *Γραικός*<sup>14</sup>.

The author asserts that the identity of the Byzantines in Nicaea consisted of two contradictory elements, the ethnic Hellenic element and its rejection, the Roman element, this last referring to the Greek-speaking Orthodox. The name *Γραικός*, according to Gounaridis, was imposed by the Latins, so it could not be identified with *Ἐλλην*. He concludes that Nicaea was aiming at the restoration of the empire, which naturally was the opposite of a national idea, a conclusion which is correct since nationalism and the idea of the nation-state belong to the modern era.

## The Terms in the Sources

### *Ρωμαῖος*

It is commonplace to note that the Byzantines called themselves *Romans* (*Ρωμαῖοι*) and their state the Roman State (*Ρωμαίων πολιτεία*). Their laws and institutions derived from ancient Rome, although there were occasional reforms, according to the needs of the times<sup>15</sup>. Similarly, the ecumenical ideology of the state was also of Roman origin, but in the Byzantine period it had the additional feature of being Christian. Thus, the political connotation of the term *Ρωμαῖος* was inextricably connected with the religious element<sup>16</sup>.

Looking into the meaning of the term in the sources of the period under study, we note that it is primarily linked to the state and the government. Initially, we shall mention two characteristic excerpts that mark the beginning and the end of the Nicaean state. The first comes from the early years of the Nicaean state, on a document dated June 1207, and refers to the title of the ruler of Nicaea: Ό ἐν Χριστῷ τῷ Θεῷ πιστὸς Βασιλεὺς καὶ Αὐτοκράτωρ Ρωμαίων (Faithful in Christ *Basileus* and Emperor of the Romans). This is the earliest example of the signature of Theodore I Laskaris<sup>17</sup>, addressed to the *πρόκατωρ* of the theme of Thrakesion Basileios Blatteros<sup>18</sup>. Laskaris and his successors use the same title as did the rulers of Byzantium, and in fact in Greek, since the time of Heraclius, *Πιστὸς ἐν*

The second excerpt marks the transfer of Constantinople to the emperor of Nicaea. More specifically, George Akropolites<sup>21</sup> notes that ἡ Κωνσταντίνου προνοίᾳ θεοῦ καὶ αὐθίς ὑπὸ χεῖρα τοῦ βασιλέως τῶν Ρωμαίων ἐγένετο κατὰ λόγον δίκαιον τε καὶ προσήκοντα. The historian ascertains that it was justifiable that Constantinople should come into the hands of the king of the Romans, meaning the emperor of Nicaea, with the help of God and be freed from their enemies, the Latins<sup>22</sup>. quotation, the state terminology (*βασιλεὺς Ρωμαίων*), the religious faith (*προνοίᾳ Θεοῦ*) and the significance of this event (*κατὰ λόγον δίκαιον καὶ προσήκοντα*) are intertwined.

If we focus on the scholarly works, such as historiography, orations, letters and court poetry, rather than on official documents, we observe that the term *Ρωμαῖος* is primarily linked to the emperor and refers to administrative matters. Needless to say, that the formal title of the ruler of Nicaea is *emperor of the Romans* (*βασιλεὺς Ρωμαίων*)<sup>23</sup>, even if his reign was only over the eastern parts of the former Roman Empire<sup>24</sup>. He is also addressed as the protector of the Romans, as Akropolites writes in his funeral oration for John III Vatatzes<sup>25</sup>.

*Ρωμαῖος* can also refer to the people of ancient Rome. Thus, Blemmydes in his work on the ideal sovereign writes about Cato who was a Roman general. Blemmydes makes no distinction between the pre-Christian Romans and the Romans of his time, as if he considers them to belong to the same people, just in different eras<sup>26</sup>.

to the return of the Byzantines to Constantinople, see how it is presented by Akropolites I, 88.35-39: ἐν εὐφροσύνῃ γοῦν καὶ θυμηδίᾳ πολλῇ καὶ ἀπλέτῳ χαρᾶ τὸ Ρωμαϊκὸν τῷ τότε γεγένηται πλήρωμα· οὐδεὶς γάρ ἦν ὁ μὴ σκιωτῶν τε καὶ ἀγαλλόμενος καὶ μικροῦ δεῖν τῷ πράγματι ἀπιστῶν διὰ τὸ ἀπροσδόκητον τοῦ ἔργου καὶ τὸ ὑπερβάλλον τῆς ἡδονῆς.

In theological or ecclesiastical context, however, the term *Ῥωμαῖος* acquires yet another meaning, defining a person who comes from Old Rome in Italy or is connected to it in some way, such as the Pope himself<sup>27</sup>. It can also obtain a more specific connotation, that being a member of the Western Christian Church, a meaning which is attested primarily when referring to dialogues and disputes between the two Churches<sup>28</sup>. Mesarites' quotation about the old and the new Rome is enlightening on this matter, as it explains the reason by which Constantinople was named New Rome; the City was lavished with the same ecclesiastical honours as ancient Rome<sup>29</sup>.

It should be taken into account that during the negotiations between the two Churches, and despite disputes, the Byzantine authors emphasize that the common name, Rome, underlines the common descent of both peoples, which in turn should lead to concord and unity<sup>30</sup>.

Nevertheless, the name *Ρωμαῖος* retains its primary explication, denoting the Byzantine Empire, the emperor and his subjects, as is attested in various sources such as state documents and scholarly literature<sup>31</sup>. In order to define its various meanings, the term should be examined within its own context.

### *Ἐλλην*<sup>32</sup>

The second term to be examined is the name *Ἐλλην* and its derivatives. The study of the sources of the period under consideration leads to the

32. Modern research on the subject of the Greek element in Byzantium has resulted in two trains of thought. The first accepts the presence of the Greek (or Hellenic) element as an integral part of the Byzantine identity and even traces it back to the pre-Christian past; the other tendency views it as a “mimesis” or as an intentional revival, serving the needs of a specific historical period. From the relevant bibliography see indicatively C. MANGO, Byzantine Literature as a Distorting Mirror, *Inaugural Lecture, University of Oxford, May 1974*. Oxford 1975, 3-18; P. conclusion that the meaning of the term varies depending on the context of the text. Niketas Choniates refers by it to the ancient Greeks<sup>33</sup>, a connotation which is already known from the sources of the previous centuries. In Choniates' work, however, the term also refers, quite often, to the author's contemporaries, whom he usually designates by the name *Ρωμαῖοι*. A passage from his "History" is quite illuminating on the matter: the author narrates the march of the Crusaders and laments the collapse of Byzantium. In poetic style, he personifies the river Alphaeus, who is Greek (or rather, *Ἐλλην*) and flows into Sicily. Choniates then implores him not to tell the inhabitants of the island the misfortunes of the Greeks (*Ἐλληνες*); nor the sufferings that the Hellenes have inflicted upon other Hellenes<sup>34</sup>. Using the phrase "sufferings of the Hellenes" the Byzantine scholar refers to the conflicts between the Angeloi emperor brothers, who led the Crusaders into Constantinople. Elsewhere in his narrative, Choniates states that he has no intention of wasting History, "the most beautiful invention of the ancient Hellenes" (*τὸ κάλλιστον εὔρημα τῶν Ἑλλήνων*)<sup>35</sup>, recounting deeds in which barbarians were victorious instead of the Hellenes<sup>36</sup>. Through the *locus communis* "Hellenes-barbarians", Choniates' contemporary Romans are identified with the Hellenes.

Choniates uses the expression *Ἑλληνὶς φωνὴ* (Hellenic voice), known from other sources, as well<sup>37</sup>, to denote the Greek language. For instance, he

accuses Andronikos I that his personal guard consisted of barbarians who barely spoke Greek<sup>38</sup>.

Nicholaos Mesarites was also an eyewitness of the first Fall of Constantinople, like Choniates. However, he does not use the term *Ἐλλην* as often as Choniates; and when he does, it is primarily to denote the ancient Greeks and moreover their non-Christian faith<sup>39</sup>. The emphasis on the religious connotation of the term is not surprising, as Mesarites was a clergyman, bishop of Ephesus and head of the delegation that conducted the theological discussions with the Latins. As far as dogma is concerned, his disagreement with them emerges in his work, as does his opinion about them, that they were barbarians and frauds<sup>40</sup>. Moreover, he witnessed the Latin Capture of 1204, which he very eloquently describes in the funeral oration for his brother John<sup>41</sup>. Nevertheless, despite his being a cleric, when commenting on the Greek language (*έλληνίδα γλῶτταν*)<sup>42</sup>, he emphasizes that this is inspired by the Holy Spirit. So, he concludes, it is appropriate to express the Christian doctrines; and for this comment, he quotes Gregory of Nazianzos<sup>43</sup>. In the same context, referring to language, Mesarites uses the

Mesarites alludes to Gregory's of Nazianzos strong conviction that the Greek language should be studied by the Christians. Gregory makes a clear distinction between the Greek language and the Greek religion, whereas he accuses the emperor Julian of identifying the two on purpose. See, for instance, Κατὰ Ἰουλιανοῦ βασιλέως στηλιτευτικὸς πρῶτος, PG 35, col. 536 A: Πρῶτον μὲν, ὅτι κακούργως τὴν προσηγορίαν

verb *hellenize* when referring to πρωτοασηκροῦτις, the Greek equivalent of an office of Latin origin<sup>44</sup>.

In the work of George Akropolites the term “Ελληνες” denotes either the ancient Greeks<sup>45</sup> or emphasizes their non-Christian religion, depending on the context in which the term is used<sup>46</sup>. In this way, he seems to make a distinction between Hellenes and Romans, as stated in the introductory lines of his historiographical work<sup>47</sup>. The derivative *Hellenic* (έλληνικῶς) refers to the Greek language<sup>48</sup> and the expression *Hellenic land* (έλληνὶς γῆ) delineates the Byzantine land<sup>49</sup>, as a synonym for the expression *Roman land* (Ρωμαῖς)<sup>50</sup>. Thus, although Akropolites avoids calling his contemporary Romans “Ελληνες”, he names their Roman land Hellenic, with a subtle touch of emotionality, caused by the use of the possessive pronoun “our”, “our

In this context, Akropolites uses the term *Roman* with the meaning of the *ancient Roman*, whereas he usually identifies it with the term *Byzantine*, e.g. op. cit., 19.2: ἐπιλαμβάνεται τῶν Ρωμαϊκῶν σκῆπτρων Ἰωάννης ὁ Δούκας.

Hellenic land”<sup>51</sup>. It should be noted that the *Hellenic land* functions as a symbol in the thought and works of the Byzantine scholars, as they were educated in ancient Greek literature. This Hellenic land, however, is not only a locus literatus, an imaginary homeland, but it is described as an actual land designated by the Pyrenees, the Pindos mountain chain in Epiros<sup>52</sup>.

The term “*Ἑλλην*” appears in the work of Theodore II Laskaris much more often as compared with those of the aforementioned scholars. The term denotes, again, either the ancient Greeks<sup>53</sup> or particularly their non-Christian faith<sup>54</sup>. It refers to the education of the Byzantines that was based on ancient Greek literature<sup>55</sup>, and to the Greek language, which Laskaris loved more than “breathing”, as he clearly states in one of his letters<sup>56</sup>. Furthermore, he very clearly links the name “*Ἑλλην*” with his Byzantine contemporaries, as well. Thus, he speaks of the “Hellenic troops”<sup>57</sup> and the “Hellenic spear” which liberated the Roman towns and castles<sup>58</sup>. In one of his letters, he narrates a

philosophical debate that took place between him and a noble scholar from the West in which he emerged victorious<sup>59</sup>, an event that was a cause for rejoicing and glory not only for those who witnessed it, but for all the Hellenes in general<sup>60</sup>. As far as concerns the land where his contemporary *Hellenes* live, he uses the phrases “Roman land” (ρωμαϊς γῆ),<sup>61</sup> “Hellas” (Ἑλλάς)<sup>62</sup> and “Hellenikon” (τὸ Ἑλληνικόν), alternately<sup>63</sup>.

It should be emphasized, though, that Laskaris makes derogatory comments about the ancient Greeks and rejects their philosophy, which he studied and admired, when this does not abide with Christian doctrines<sup>64</sup>.

The name *Γραικὸς* does not appear for the first time in the Byzantine sources of the 13th century. Although the relevant quotations are limited, they are quite clear in their content; they refer to the Greek language and culture as well as to the people of Greek (Hellenic) origin<sup>65</sup>. period, the term is used within the context of conflicts between 'Latins' and 'Greeks', mainly concerning their religious conflicts<sup>66</sup>, but sometimes also referring to their character or moral matters<sup>67</sup>. Moreover, in some passages, the term refers to the Greek language, as in older texts<sup>68</sup>.

It should be noted that the term is more often found in texts written at a time when the Byzantines came into closer contact, or even conflict, with the Westerners than in previous centuries. As has been documented, the western sources use the term *Graecus* to refer to the Byzantine emperor instead of the term *Roman*; so, the term *Γραικὸς* in Byzantine texts shows

αἰτίαν πολυπραγμοσύνης εἶναι μοι τὴν Ἑλλήνων φωνήν. τότε δὴ γελάσας ἔλεγε Γραικὸς μὲν εἶναι τὸ γένος [...]; Const. Porph. Πρὸς τὸν ἴδιον νῦν Ῥωμανόν, ed. G. MORAVCSIK, *Constantine Porphyrogenitus. De Administrando Imperio* (translation-commentary R. H. JENKINS) [CFHB 1], Washington D.C. 1967<sup>2</sup>, 49.4-7: οὗτοι [οἱ Σκλάβοι] ἐν τῷ θέματι ὅντες Πελοποννήσου ἀπόστασιν ἐννοήσαντες, πρῶτον μὲν τὰς τῶν γειτόνων οἰκίας τῶν Γραικῶν ἔξεπόρθουν καὶ εἰς ἀρπαγὴν ἐτίθεντο, ἔπειτα δὲ καὶ κατὰ τῶν οἰκητόρων τῆς τῶν Πατρῶν ὁρμήσαντες πόλεως.

66. Choniates, *Historia*, 575.68-70: καὶ τῶν Γραικῶν ἡμῶν εὐσεβέστεροι τε καὶ δικαιότεροι καὶ τῶν Χριστοῦ διαταγμάτων φύλακες ἀκριβέστεροι; see also Akropolites, who uses the term as an alternative to *Ἑλλην* and a differentiation to *Italian*, whereas (as he writes) they both have a common name, i.e. *Roman*, Akropolites II, *Contra Latinos* B, 27.16-22: οὐκ ἄλλα ἄπτα τῶν ἐθνῶν εἰς τοσαύτην προέβη τὴν δόμονοιαν καὶ τὴν σύμπνοιαν ὡς Γραικοί τε καὶ Ἰταλοί. καὶ εἰκότως ἐκ Γραικῶν γὰρ τοῖς Ἰταλοῖς καὶ αἱ λογικαὶ ἐπιστῆμαι καὶ τὰ μαθήματα. κάντεῦθεν ἵνα μὴ τοῖς ἐθνικοῖς τούτοις ὀνόμασι περιγράφωνται, τῇ πρεσβυτέρᾳ Ρώμῃ ἐτέρᾳ νέα ἀντωκοδόμηται, ἵνα ἐξ οὗτω μεγίστων πόλεων κοινὸν ἔχουσῶν τοῦνομα Ῥωμαῖοι πάντες κατονομάζοιντο.

67. Boniface of Montferrat considers Baldwin to be deceitful, unreliable and fickle, even more than the Greeks (*Γραικοί*), writes Choniates, *Historia*, 599.14-15: Γραικῶν ἀπατηλότερον καὶ τὸ ἥθος ἄπιστον καὶ παλιμβολὸν ὑπὲρ ὅστρακον καὶ κύβον τὸν Βαλδονίνον ἀποκαλῶν; cf. Choniates' comment that Germans believed they would easily defeat Romans, because Greeks (*Graikoi*, as alternative to *Romans*) were inexperienced in war matters and indulged into luxuries, Choniates, *Historia*, 477.9-20: οἱ δὲ Ἀλαμανοὶ τοσοῦτον ἀπείχον ἔκθαμψι τοῖς δρωμένοις τούτοις φανῆναι, ὥστε καὶ ἀνέθαλπον μᾶλλον τὸν ἔρωτα, διν ὑπέτυφον ταῖς λαμπρειμονίαις τῶν Ῥωμαίων ἐνανόμενον, καὶ ηὔχοντο τάχιον κρατῆσαι Γραικῶν ὡς ἀγενῶν τὰ ἐξ πόλεμον καὶ περισπουδαξόντων τὰς ἀνδραποδάδεις χλιδάς; Nikolaos Mesarites, I, 47.27-30: καταμεμήνυτο γὰρ ὡς ἔστι τις τῶν μονοτρόπων ἐνταῦθα κρείττων τῆς ἐπενεχθείσης τοῖς Γραικοῖς συμφορᾶς, φρόνημα πλοντῶν ἀκλινὲς καὶ πρὸς πειρασμοὺς ἀδαμαντίνου λίθου στερρότερος.

68. Mesarites III, 47.14-15: καὶ οὐ Λιβύη Ἐύρωπη τὲ καὶ Ἀσία τῆς τῶν Γραικῶν διαλέκτου πεπλήρωται;

either an allusion or direct reference to the Latins. Nevertheless, it is hard to believe that the Byzantine scholars were unaware of the Greek, not Latin (at least, not necessarily Latin) origin of the word *Γραικός*, since it is mentioned for the first time in Aristotle's *Meteorology* as a synonym for *Ἐλλην*<sup>69</sup>. Besides, the words *γραικός* and *γραικώ* were already in use in certain sources of the 9th and 10th centuries (in Theophanes and in Leo VI), in which they are connected to the Greek language<sup>70</sup> and are not used either in contexts of controversy or to allude to the Latins.

However, it should be noted that in all the above-mentioned texts the name Roman is used when referring to the Byzantines. Furthermore, this is the name which carries political weight and is linked to the State.

### Conclusions

In the first half of the 13th century, the meaning of each of the three terms – *Ῥωμαῖος*, *Ἐλλην*, *Γραικός* – is susceptible to different interpretations,

69. Aristotle, *Meteorologica* A, 352b.1-3: οὗτος γὰρ [ό ποταμὸς Ἀχελῶος] πολλαχοῦ τὸ δένημα μεταβέβληκεν ὕκουν γὰρ οἱ Σελλοὶ ἐνταῦθα καὶ οἱ καλούμενοι τότε μὲν Γραικοὶ νῦν δὲ Ἐλληνες; cf. *Hesychii Alexandrini lexicon*, ed. K. LATTE, vol. 1, Copenhagen 1953, γάμμα 881.1: *Γραικιστί* Ἐλληνιστή; *Suidae Lexicon*, ed. A. ADLER, Leipzig 1928-1935/ Stuttgart 1967-71), γάμμα 447.1: *Γραικοί* οἱ Ἐλληνες. ἀπὸ κώμης τινὸς ἢ ἀπὸ Γραικοῦ τινος; *Etymologicon magnum*, ed. T. GAISFORD, Oxford 1848/Amsterdam 1962, 241.15: *Γραικός* *Ῥαικός*, Ἐλλην *Ῥωμαῖοι* δέ, τὸ γ προσθέντες, *Γραικὸν* φασί.

TSARAS, Τὸ νόμιμα τοῦ γραικώσας στὰ Τακτικὰ Λέοντος ΣΤ' τοῦ Σοφοῦ, *Βυζαντινά* 1(1969), 135-157, according to whom 'Γραικός' means the 'Orthodox Christian Greek'; see also above, footnote 66.

depending on the context in which they are used. The term which particularly presents semantic diversity is the term *Ἐλλην*.

1. All three collective nouns signify specific convictions and values of the social group that authored the texts, in which the terms appear. These convictions and values can be classified into three categories, namely political, educational and that of faith. A. Politically, the members of this social group are *Romans*. B. As far as the language, the education, the ethos and the culture are concerned, they are *Hellenes*. C. As far as their faith is concerned, they are Greek-speaking Christians, i.e. ‘Graikoi’.
2. These three terms compose a unified set. A set with distinct but strong and integral components, each implying and defining one another, without, however, altering their individual connotations. These are the elements that constitute the self-image of the scholar and nobleman in Nicaea.

Στο άρθρο εξετάζονται οι σημασίες και οι συνυποδηλώσεις των συλλογικών ονομάτων *Ρωμαῖος, Ἑλλην καὶ Γραικὸς* κατά την περίοδο της αυτοκρατορίας της Νικαίας, οι οποίες ποικίλλουν ανάλογα με τα συμφραζόμενα εντός των οποίων αυτά απαντούν. Καθένα από τα ονόματα συνδέεται με συγκεκριμένες αξίες της πολιτικής, της παιδείας και της θρησκείας. Αποτελούν ένα ενιαίο σύνολο με διακριτά, αλλά ταυτοχρόνως αναπόσπαστα συστατικά μέρη, και δηλώνουν την συλλογική ταυτότητα του ευγενούς και του λογίου στην Νίκαια.
