SD1. Individual biological information on the eleven uncommon pelagic cephalopod species reported in this study. ML: mantle length (in mm); TW: total weight (in g); Sex: female, male, Indeterminate; MS: maturity stage (I indeterminate, 1 immature, 2 maturing, 3 mature); GSI: gonadosomatic index; DGI: digestive gland index; FWI: fullness-weight index. Date, location (Lat: latitude, Lon: longitude) and source (1: scientific survey; 2: commercial fleet; 3: beach stranding) of the findings shown. The species are listed in alphabetical order.
