**Table B.** Mean trophic level (TROPH) estimates for 87 fishes common in Stergiou & Karpouzi (2002) and the present study. FTG=functional trophic group; H=pure herbivore (2.0<TROPH<2.1); OV= omnivore with preference to plants (2.1<TROPH<2.9); OA=omnivore with preference to animal material (2.9<TROPH<3.7); CD=carnivore with preference to decapods and fish (3.7<TROPH<4.0); and CC=carnivore with preference to fish and cephalopods (4.0<TROPH<4.5).

Species	Stergiou & Karpouzi (2002)		present study		Change in FTG
