Temporal and spatial genetic variation of *Engraulis encrasicolus* in the Adriatic Sea

Sara MALAVOLTI, Paolo RUGGERI, Tatiana FIORAVANTI, Vjekoslav TIČINA, Ilaria COSTANTINI, Andrea DE FELICE, Andrea SPLENDIANI, Denis GAŠPAREVIĆ, Vincenzo CAPUTO BARUCCHI and Iole LEONORI

Mediterranean Marine Science, 2021, 22/4, Special Issue

Table S1. Summary of genetic variability observed at 13 microsatellite loci in the sampled populations. $N_{A\ TOT}$ = Number of alleles observed in a specific locus; N_A = number of alleles observed *per* location; N = number of individuals correctly genotyped; H_O = observed heterozygosity; H_E = expected heterozygosity; F_{IS} = inbreeding coefficient estimates; R_S = allelic richness estimates standardized at 22 individuals.
