Fig. S1: Razorbill biometric measures. Schematic representation of biometric measures of the head and the bill, measured with a digital calliper (± 0.01 mm). HL is for the head length (dashed line); BL for bill length (dash-dotted line) and BD for bill depth (dotted line) measured at the gonys (cfr. Material and methods – to be referred also to Table 2). Razorbill picture is by © Michelangelo Ambrosini.

Table S1. List of Razorbill food items in the Mediterranean Sea during winter 2022/2023. Data type, country, region, location (when available) and date for each record are reported. Food items have been identified at the lowest taxonomic level possible.
