Open Schools Journal for Open Science

1. Preface

We are proud to share with you the new Issue of the Open Schools Journal for Open Science. This issue presents one article and 13 posters presenting in detail the research work conducted in Greek school classroom. In the article one can see the manners that the teacher followed in order to organise and to motivate the children to get exposed to the beauty of scientific research and in each poster one experiment is described. Materials needed, procedure to follow, educational objectives and conclusions help to understand the impact these actions can have on students and facilitate teachers to replicate this work in real classroom conditions.

We are very happy for this issue that also provides an insight of the reality of implementing research in class.

This issue is in Greek.

Enjoy!
